

PRIMA VISTA

designed by Tom McHugh

Prima Vista is a dynamic contemporary statement that features a sweeping bowfront flanked by high sidewalls. A thick prow edged transaction surface "floats" at 40", 3/8" above this bowfront on bullnosed dentils. This top may be specified in matching or contrasting wood, stone, or leather wrapped. The bowfront is standard in flat cut cherry to match the sidewalls, but may be optioned as birdseye maple, sycamore or laurel burl with black accents. A 3/8" accent bead on the sidewalls can be finished in natural maple, black, or to match the sidewalls. Sidewalls are 46 5/8" high and capped in shaped, solid wood. Black locks are standard on all drawers and are keyed alike by set-up.

Due to the unique detailing of this product, desk/return or desk/bridge/credenza configurations feature unbroken side panels. See the following configuration and individual component pricing pages for further information.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All Configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

Additional finish options may easily be specified on Prima Vista bowfronts. Please contact your CCN Representative for more information on pricing and availability.

CROFTON

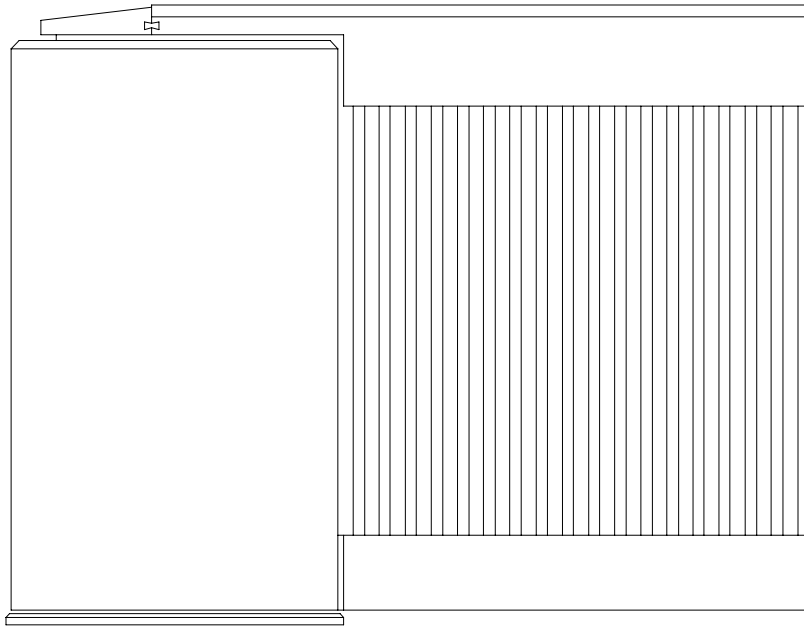

designed by John L. Bodag

CROFTON, created by CCN International in collaboration with John L. Bodag, Director of Design of Ford & Earl Design Associates is based on the design principles of the Arts & Crafts Movement, a philosophy that held that aesthetics and functionality should co-exist rather than be considered mutually exclusive.

Quartered, Figured White Oak and Quartered Cherry are employed for their clean, linear grain character which reinforces the strong horizontal/vertical interplay. The CROFTON Collection features cantilevered, beveled edge treatments and deep spindle details. Fine craftsmanship is expressed by the accented dovetail keys that punctuate the meticulous joinery.

Drawers and lower hinged doors are flush panels with an integrated, crescent-shaped pull. The pull is offered with a square or radius pattern front and is available in pewertone, bronzetone and blackpowder coat finish.

The design of CROFTON has been carefully developed with proportioning and details intended for maximum visual integrity while still responding to utility. Modifications are not encouraged. Any request for modification of the CROFTON product will necessitate a review by the product designer and will affect CCN's timely response to a special inquiry.

TALISMAN

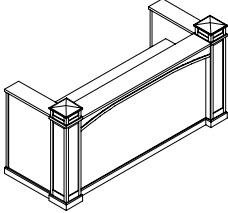

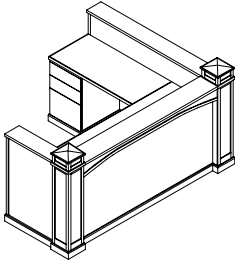

Talisman's form and detailing recalls and reinterprets the styling of mission and prairie style furniture. 11" x 11" x 44" high corner bollards with pyramidal caps anchor 8½" thick x 39"H panels supporting 1¼" thick worksurfaces. Connections between worksurfaces are made via simple butt joints. A 3" high wood base is employed throughout. The approach side of the desk features a 1" thick transaction surface and a modesty panel recessed 3½" back from an arched transaction surface support. Corner bollards have a 6¼" x 1⅜" inset area at the top which may be specified in a lacewood accent. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

Due to the unique detailing of this product, desk/return or desk/bridge/credenza configurations feature unbroken side panels. See the following configuration and individual component pricing pages for further information. In addition, the 8½" thick panels provide the opportunity for extensive accommodation of electrical and data requirements. See separate accessory price list for a listing of accessory items intended for use in such applications.

KUBIT

Kubit is a contemporary design which features a 3/4" thick x 12" deep tempered glass transaction surface raised 3" above the wood case on 1 1/4" diam. stainless steel posts. The case pieces are simple rectilinear elements with 4" high solid wood bases which are recessed 3/4". Worksurfaces are 1 1/4" thick with a square edge. Connections between worksurfaces are made via simple butt joints. Black locks are standard on all drawers and are keyed alike by set-up. The transaction surface is standard in tempered glass, but may be specified in granite at an upcharge.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The C and D pedestals are interchangeable at the same price. All Configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

Because of the clean mitered joinery and flush veneer panels, Kubit lends itself to the use of exotic veneers. Market values on these materials vary, so it is necessary to contact your CCN Representative for more information on pricing and availability. Species offered include Figured Anigre, Figured Sycamore, Laurel Burl, and Birdseye Maple.

CLASSIC

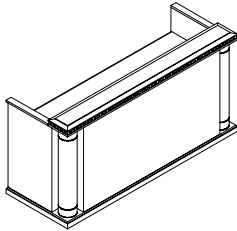

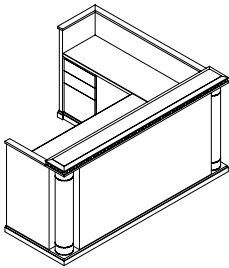

Classic is a reinterpretation of ancient architectural motifs. 10¼" step back corners allow for 8⁵/₈" diameter columns on the desk approach side which support a 3" thick transaction surface detailed with a dentil frieze. The columns and body rest on a 2¹¹/₁₆" high mitered plinth base. Each column is detailed with 4 black rings. Worksurfaces are 1¼" thick with a square edge. Connections between worksurfaces are made via simple butt joints. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

SCULPTURE

Sculpture is a contemporary design that combines the intersection of solid geometric forms. The 8" thick front transaction element is the focal point of the piece and is available in stone or contrasting wood finishes. The body of the desk incorporates 2" thick 42"h wood gallery panels, 1¼" thick wood worksurfaces, and wood storage elements. Square edged worksurfaces connect via simple butt joints. Black locks are standard on all drawers and are keyed alike by set-up.

Due to the unique detailing of this product, desk/return or desk/bridge/credenza configurations feature unbroken side panels. See the following configuration and individual component pricing pages for further information.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

Empress Green marble or Black Absolute granite are the standard stone offerings and Cherry or Maple are the standard wood offerings for the 38"h desk front which may be finished in matching or contrasting colors. Additional finishes and exotic veneer options are available upon request. Please submit sample for match and pricing.

FRANKLIN

Franklin is a traditionally styled grouping with solid wood raised panels employed for vertical surfaces. 2" wide solid rails encase each panel and all rests on a 3" high mitered plinth base. The approach side of the desk features a either a straight stepped front (option 1) or a concave bow front (option 2 - as shown). Work and transaction surfaces are 1¼" thick with an ogee profiled edge. All edges are mitered at the corners. Where return and bridge tops join desk and credenza worksurfaces, the edge is interrupted and continued with an inside mitered connection. Finish on pulls is bright brass. Black locks are standard on all drawers and are keyed alike by set-up.

Due to the unique detailing of this product, desk/return or desk/bridge/credenza configurations feature unbroken side panels. See the following configuration and individual component pricing pages for further information.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

TYMPANI

Tympani consists of $\frac{1}{4}$ circle and straight segments with 42 $\frac{1}{2}$ " high gallery fronts. Detail and rhythm are developed through a pattern of applied solid wood mullion and muntin strips. An optional version is available without vertical mullion. A 3" high toekick base is recessed $\frac{3}{4}$ " and faced with black plastic laminate. Work and transaction surfaces are 1 $\frac{3}{4}$ " thick with bevel eased edges. In-line segments are not detailed on adjoining edges and connections are made via simple butt joints. Where bridge segment tops join credenza worksurfaces, the edge is interrupted and continued with an inside mitered connection. This allows a smooth transition between worksurfaces. The inside face of the vertical panels (i.e. The kneespace and "tackboard" area) is surfaced in black laminate. Black locks are standard on all drawers and are keyed alike by set-up.

Legs and aprons on occasional tables are standard w/ leather wrap. The smaller inset panels on the reception workstation may also be specified w/ leather surfaces for a nominal upcharge.

This price list allows a certain amount of flexibility with the drawer storage components. The box-box-file pedestals (6-6-12) indicated with the letters A or C and the file-file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. Tympani freestanding pedestals are finished on two sides.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

Please note that pedestals are only located in straight return sections, except where noted. Due to the geometrics involved, the use of pedestals in curved sections is highly impractical in terms of seated usability,

JANUS

designed by Roberta Gossett

Janus provides a bold opening statement with emphatic horizontal bands linking recessed feature panel with extended corner blocks (“quoins”). A $\frac{3}{4}$ " thick by 12" deep transaction surface is raised 3" above the wood case on $\frac{1}{4}$ " diameter stainless steel posts. Horizontal bands are 2" high, recessed $\frac{1}{2}$ " from the face of the recessed feature panel. A total of three finishes may thus be specified. Maple body/reverse box Birds Eye Maple accent front/Cherry quoins/Black banding is standard. The 12" bowtop transaction surface is standard in tempered glass but may be specified in granite at an upcharge.

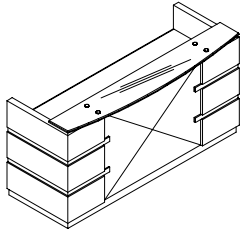

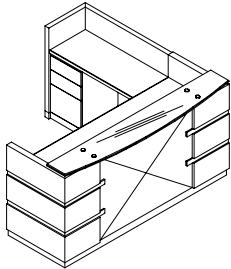

Worksurfaces are $\frac{1}{4}$ " thick with a square edge. Connections between worksurfaces are made via simple butt joints. Black locks are standard on all drawers and are keyed alike by set-up.

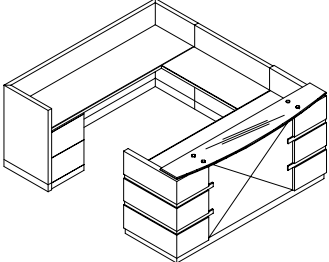

Due to the unique detailing of this product the juncture of desk/return is disguised. See the following configuration and individual component pricing pages for further information.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price.

The overall dimensions indicated throughout this price list for each item include the projection of the top detail. When components are configured together to form larger assemblies, this projected detail is eliminated but the body of the unit remains the same. Therefore the overall combined dimension of a configuration will not be the sum of the single unit's dimensions. This assures a transition between components that is tight and free of gaps. In some cases duplicated panels may be eliminated for a cleaner appearance. Contact the factory for exact dimensions if overall size of a configured unit is required.

TOCOTTA

designed by Don Killaby

Tocotta is a unique combination of design elements that enables the use of different finishes and surface materials to create a product statement of tremendous range. The 2" thick stepped beveled top edge allows within the break of the bevels the first opportunity for material or color contrast. The ¼" raised section of the worksurface is identified as the top element. The edges on all worksurfaces, tables and tops are all mitered. Where adjoining surfaces with the edge profile meet, the edge is interrupted and an inside miter joint provides a continuous transition.

The other design elements that provide for contrast are the recessed 2¼" plinth base and the vertical corner pilaster which is a ⅝" radius column. These components, along with the finish on the drawer interiors, are identified as the trim of the unit and are constructed with solid wood.

The body of the Tocotta unit is the vertical panels that form the pedestals, the surrounds, and the door and drawer fronts. These panels have subtle ⅜" bevels on their edges. The upper storage components are 1¼" profile with the same ⅜" bevel. Drawers are opened with recessed side finger access. The hinged doors have touch latch hardware or bottom edge access where possible. Necessary exposed hardware is used on lateral file drawers. Black locks are standard on all drawers and are keyed alike by set-up.

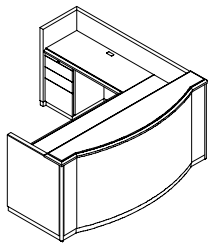

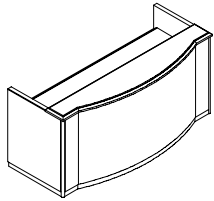

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area.

For more specific information on Tocotta and how to order or specify, please refer to the separate Tocotta price list.

T O C O T T A

Above pricing reflects standard cherry and maple finishes. Consult sales representative for any variation of size, configuration, finish or wood species.

BARRINGTON LE

Barrington *LE* is an enhanced version of Barrington that introduces accent borders of quartered figured limba on primary panels throughout the product offering. This border provides a subtle contrast placed in between the plain sliced bookmatched cherry infield and the traditionally detailed solid wood trim. The standard configuration of these borders is determined by the locations of the vertical pilaster details. Typically there will be one border pattern within the space established by the vertical pilasters. The Barrington *LE* reception desk has a mitered 2¼" short grain border on the front approach panels and mitered 1¾" short grain border on the transaction tops. The reception desk worksurfaces, reception desk drawer fronts and the pilastered table bases **DO NOT** have the short grain border pattern included in the price. The Barrington *LE* price column reflects the borders as located in the above descriptions. If a different application of the accent border is required than what is outlined in this pricelist, please contact the factory to discuss the desired placement of the borders and the corresponding price, whether on the tops or vertical panels.

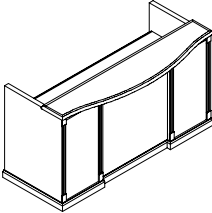

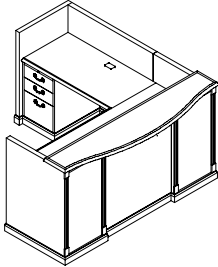

BARRINGTON

Barrington is a traditionally trimmed and detailed product design. The worksurface is 1¼" thick with a reverse ogee edge, supported by a detailed pedestal with 2¾" mitered plinth base. All edges are mitered in the corners. Where return and bridge tops join a desk and credenza worksurface, the edge is interrupted and continued with an inside mitered connection. This allows a smooth transition between worksurfaces. A stepped and fluted stile trims the vertical elements on the approach of the desk, the end panels of door and drawer units, and the vertical panels on upper storage components. The tops of high-rise storage units and anchors have a 3" crown molding to complete the traditional detailing. The approach side of the desk has a stepped modesty panel, and the back of credenzas and storage units are flush, finished and do not include the base detail. The finish on the pulls is bright brass. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6- 6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price.

The overall dimensions indicated throughout this price list for each item include the projection of the edge and crown molding details. When components are configured together to form larger assemblies, this projected detail is eliminated and in some cases panels are added or eliminated, but the body of the unit remains the same. Therefore the overall combined dimension of a configuration will not be the sum of the single unit's dimensions. This assures a transition between components that is tight and free of gaps. In some cases, duplicated detail or panels may be eliminated for a cleaner appearance. Contact the factory for exact dimensions if overall size of a configured unit is required.

Charisma Stepped Modesty

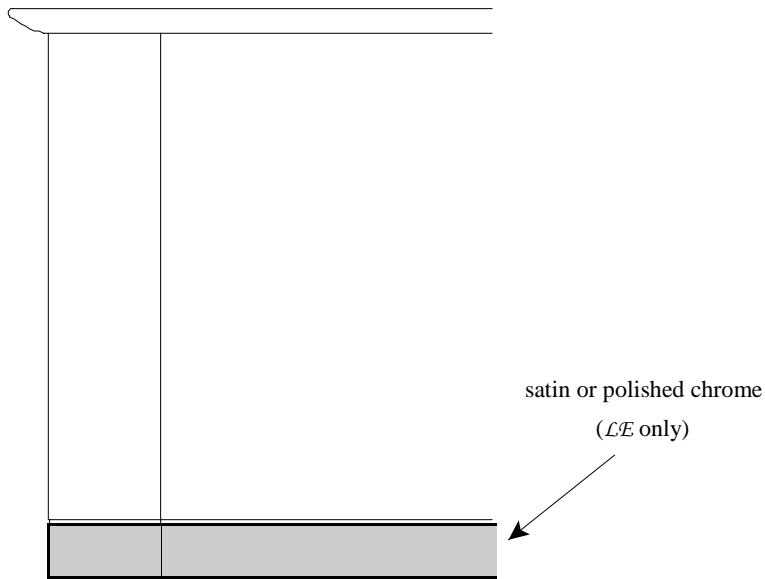

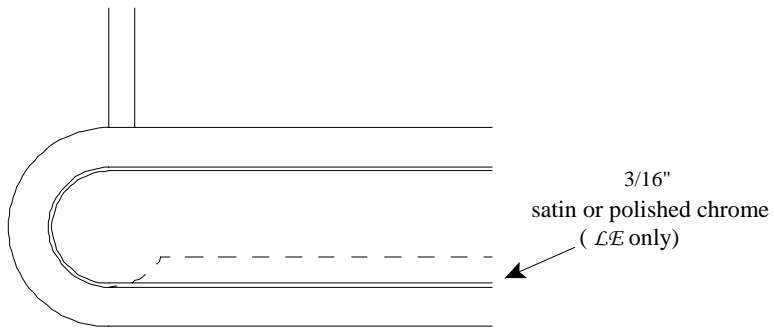

CHARISMA

Charisma is a contemporary design that features a 1¼" cantilevered edge that projects 2". The top of the edge is flush with the worksurface and softened with a ¼" radius. The bottom of the edge is a gentle elliptical shape that forms the knife edge. This knife edge is mitered in all corners. Where return and bridge tops join desk and credenza worksurfaces, the edge is interrupted and continued with an inside mitered connection. The tops are supported by square cornered pedestals with a flush 2¾" high mitered hardwood base. This horizontal base is separated from the vertical side panel with an ⅛" recessed reveal. Where a pedestal is not present, there are vertical support panels that are 1¼" thick with square edges. The approach side of the desk has a stepped modesty panel, which allows visitor pull-up. The backs of credenzas are flush, finished and do not include the base detail. The finish on the pulls is polished chrome, or satin black. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box-box-file pedestals (6-6-12) indicated with the letter A or C and the file-file (12-12) indicated with the letter B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusion, overhang or thickness of detail(s). When multiple components are configured together to form larger assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area

As illustrated at left and below, Charisma gallery desks are available in either of two configurations: with a Column End or Stepped Modesty on the approach side. The Column End features a 8¾" diameter tall cylinder at each end and a recessed straight modesty panel between. The Stepped Modesty substitutes a broad flat panel for the ends with a concave bow modesty that is contrasted by a convex bow transaction top.

Charisma Column End

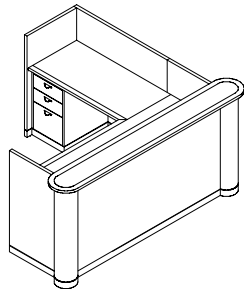

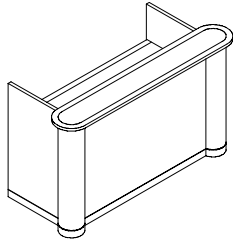

CHARISMA LE

Charisma **LE** is an enhanced version of Charisma that incorporates the use of satin or polished chrome accents. The satin or polished chrome finish on the 2½" high plinth bases allow the lower components to float above the floor. This base accent is applied to all Charisma **LE** products. Matching satin or polished chrome transaction top inlays are 3/16" wide and separate the 2" cantilevered edge from the veneer infield. The inlay creates an opportunity to select an optional veneer top of Birdseye Maple, Quartered Figured Anigre or Laurel Burl. Contact factory for pricing on the accent veneer tops.

Charisma **LE** also includes satin or polished chrome enhanced door and drawer hardware. A matching 6" wide bowed handle will be used on reception station door and drawer storage components. The lock plugs on the Charisma **LE** product match the satin or polished chrome finish of the metal accents. Optional wire exit grommets are available in separate Accessories price list, in matching metal finishes.

SOLON

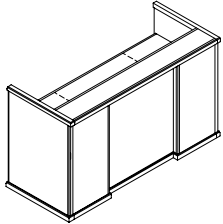

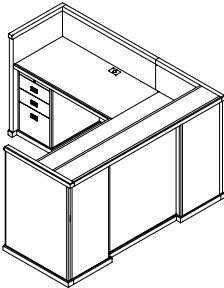

Solon is a transitional product design that incorporates the traditional format of top over a supporting pedestal, set on a mitered plinth base with simple edge detail. The tops are 2" thick with a double ¼" radius on the top and bottom of the solid hardwood edge. These edges are mitered in all corners. Where return and bridge tops join desk and credenza worksurfaces, the edge is interrupted and continued with an inside mitered connection. This allows a smooth transition between worksurfaces. The side panels of each unit have the same double ¼" radius detail on the vertical edges. The 2" high plinth base projects ½" with the double ¼" radius shape on the top corner. The approach side of the desk has a stepped modesty panel in keeping with the traditional format. Backs of credenzas are flush, finished and do not include the base detail. Drawer access is accomplished with a recessed and radiused campaign-style pull. Doors are opened with a single round knob, except where bottom edge access is available, (ie: Hi-Rise Storage.) Both pieces of hardware are standard as bright brass. Black locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area

1 adjustable shelf behind each pair of hinged doors

Refer to separate CCN Solon pricelist for complete line of matching tables, casegoods etc.

ENCLAVE/NUANCE

Enclave is a 2" profile design that features a 1" quarter radius that combines with a 1" 45 degree bevel.

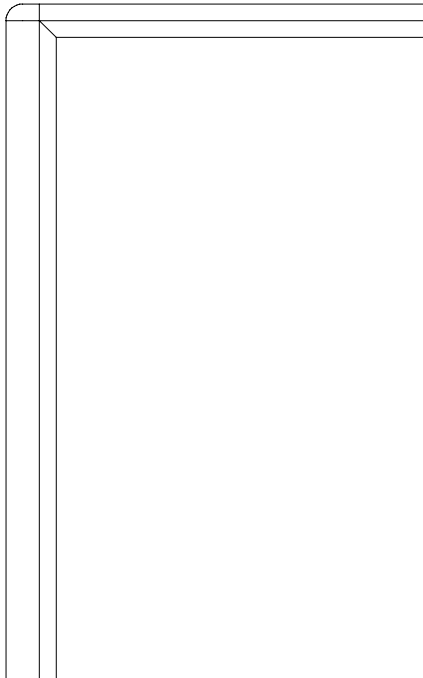

Nuance is a 2" profile that joins a double ¼" radius detail with a 1" 45 degree bevel. These two elements are separated by an ⅛" black rigid vinyl beaded trim.

These designs utilize a counter-profile shape on the ends of return or bridge tops when connecting to a desk or credenza top. This allows a smooth transition between worksurfaces.

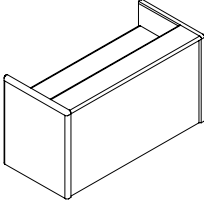

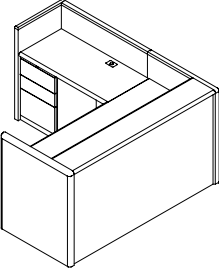

Drawers are opened by recessed side finger access. The hinged doors have touch latch hardware or bottom edge access where possible. Necessary exposed black hardware is used on lateral file drawers. Locks are standard on all drawers and are keyed alike by set-up.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

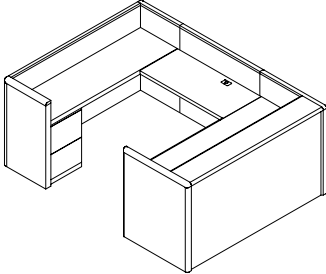

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area

FOUNDATION

Foundation reception desks consist of a 41¼" high Gallery workstation capped by a 1½" high transaction surface (total height = 42¾"). Simple square edged detailing is employed throughout except for the visitor side edge of the transaction surface which may be specified as **a** (bevel), **g** (ogee), **m** (reeded), **q** (square), **r** (bullnose), or **s** (step radius).

Any of six hardware styles may be specified. These include: **1** a square section loop pull, **2** a semi-traditional loop pull, **3** a double ribbed loop pull, **4** a flat bar pull with radiused ends, **5** a tapered loop pull, or **6** a curvilinear pull. Several different finishes are available on each. Please refer to the Foundation pricelist and literature for further information on edge profile and hardware.

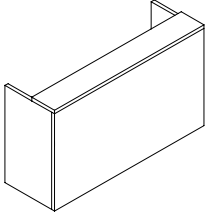

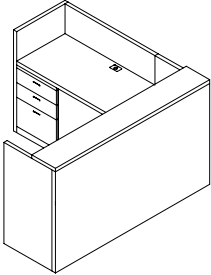

Options include a transaction surface with a bow contour on the approach side and/or Applied Feature Fronts. Five options are offered for Feature Fronts, including plain vertical grain maple or cherry, vertical grain cherry or maple ¼" x ¼" black horizontal reveals, reverse box pattern birdseye maple, chevron pattern sycamore or anigre, or contrast square inlay.

This price list allows a certain amount of flexibility with the drawer storage components. The box/box/file pedestals (6-6-12) indicated with the letters A or C and the file/file (12-12) indicated with the letters B or D are interchangeable. Within the model number, the letters after the dimensional numbers communicate the drawer configuration. These letters indicate the sequence and type of drawer storage on the unit. The A, B, C and D pedestals are interchangeable at the same price. All configurations illustrated include one C and one D pedestal.

The overall dimensions indicated include any protrusions, overhang or thickness of detail(s). When multiple components are configured together to form large assemblies, these detail dimensions will include the elimination of conflicting or duplicated detail. Top dimensions indicated are for the net (usable) worksurface area

Grommets are standard on all gallery workstation components. Foundation gallery workstations may be integrated with other Foundation products. Please refer to the Foundation pricelist for further information
